Jim Abraham – Clerk of Works  
**E C Harris**  
Helen Sydenham – Quantity Surveyor  
**W H Snow Ltd**  
Chris Snow – Managing Director  
Tom Murphy – Con. Director  
Ian Ferro – Site Manager

As part of an expansion programme, leading educators Liverpool Education Authority, had secured a site on made ground next to Campion RC High School to build a facility for progressive learning.

W H Snow's role was to transform the 5000-sq. meter site into a state-of-the-art Learning Centre within a seven month period. The £700,000 contract was Value Engineered by the project team down from £850,000 by utilising their market experience to source and procure like for like components without altering the aesthetic appeal of the facility.

The contract was awarded by Liverpool Design Consultancy, Architects on behalf of Liverpool Education Authority and was not based on price alone.

We brought W H Snow early into this project and this helped us address, at an early stage, the many challenges of product selection, technical co-ordination and constructability saving time and money. W H Snow's innovative approach and technical competence aided the successful achievement of project goals and the turn around of a made ground site into a technologically advanced Learning Centre in less than 12 months.
